PROFESSIONAL SUMMARY

Frontend-focused software engineer with 3+ years of production React experience, building reusable UI systems and shipping web and mobile applications. At MelkRadar, reviewed 376+ pull requests and onboarded 11 developers as a Front-End Technical Lead. Also built internal automation tools that replaced manual workflows.

PROFESSIONAL EXPERIENCE

MelkRadar View details ↗

Jul 2023 – Jan 2026

Front-End Technical Lead & Internal Tools Developer · Part-Time, Freelance · Remote · Tehran

Real-estate technology platform; frontend development across its product ecosystem and internal automation.

- Developed production frontend features across **six products and initiatives** within the MelkRadar ecosystem, collaborating with product and design teams on reusable UI components.
- Reviewed **376+ pull requests** across three frontend projects over 1 year and 9 months, focusing on implementation quality, component structure, and UI consistency.
- Onboarded **11 frontend developers** through code walkthroughs, technical sessions, and training resources; transferred the review workflow to a trained teammate.
- Created **20+ reusable Chart.js templates** and plugins for over 50 reporting charts, reducing repeated development work for visual variations.
- Built an Android–backend–Telegram system that automated SMS verification-code forwarding, handling 3.5× the previous manual workflow's monthly request volume in its first month.
- Built a React-based **Excel-to-PDF report generator** with automated calculations and repeatable monthly reports.

CS Internship View details ↗

Mar 2023 – Feb 2026

Technical Mentor & System Designer · Volunteer · Remote · Tehran

Software engineering education program; technical mentorship, process design, and internal tooling.

- Progressed from web intern to technical mentor; mentored **25+ interns**, led 30+ technical sessions, and recorded a frontend workshop and Azure DevOps tutorial.
- Co-designed a multi-stage application and onboarding process with the governance team over six months; **256 people joined its entry group**.
- Helped shape internal workflows, documentation, and program operations to support collaboration, continuity, and the growth of the initiative.
- Built **CS Queue Calendar**, a React tool used for interviews and program sessions, with Google Calendar integration, automated tests, and CI/CD.
- Built CS Club Bot to submit learning posts for AI-assisted review and CS Queue Bot for queue coordination; automated setup of ~70 weekly Azure DevOps tasks, **cutting preparation from ~30 minutes to about one minute**.

SettleItGPT View details ↗

Apr 2025 – Sep 2025

React Native Developer · Independent Collaboration · Remote · Los Angeles, CA

AI-powered iOS application; product development and App Store release with its creator.

- Co-developed and **released an iOS application on the Apple App Store** using React Native, Expo, and Firebase, integrating microphone, camera, and photo-library features.
- Implemented AI-generated character voices and audio playback; contributed to subscriptions, testing, and release approval.

PROFESSIONAL EXPERIENCE · CONTINUED

Dadeh Pardazi Azmoudeh Karan View details ↗

Jul 2024 – Jun 2025

React Developer · Project-based · Remote · Tehran

Restaurant recruitment and administration platform; sole frontend developer on a two-person project team.

- Built the React frontend from scratch, including OTP authentication, dashboards, profiles, restaurant management, a résumé builder, and file uploads.
- Designed reusable components and API request utilities to integrate **60+ REST APIs** and manage data flows across the application.
- Translated changing Figma designs into responsive interfaces using Ant Design and SCSS, with reusable UI patterns and loading states.

FEATURED PROJECTS

Health Data Relay View details ↗

Aug 2026

Published Android app for private, scheduled Health Connect backups to Google Drive.

- Released on **Cafe Bazaar and APKPure** with English/Persian localization and configurable daily JSON exports to a user-owned Drive folder.
- Implemented scheduling, retry and missed-backup recovery, OAuth permissions, and GitHub Actions release automation.

Ali’s Portfolio View details ↗

Jun 2026

Interactive React portfolio with custom shelf navigation and content-driven project and career stories.

- Developed responsive galleries, interactive navigation, and bilingual stories around reusable content structures.
- Implemented **build-time SSG**, crawlable detail pages, a no-JavaScript fallback, and automated image optimization.

Fabrexa AI Ollama View details ↗

May 2026

Self-hosted Telegram assistant powered by local Ollama language models.

- Built streaming replies, selectable personalities, configurable models, and editable conversation memory.
- Added owner-only access, setup checks, technical documentation, and a dedicated project website.

TECHNICAL SKILLS

Frontend: JavaScript, React, TypeScript (working knowledge), HTML, CSS/SCSS, Ant Design, TanStack Query, Vite

Backend & Automation: Node.js, Express, REST APIs, Firebase, Telegram bots, workflow automation

Mobile & AI: React Native, Expo, Ollama, LLM integration

Tools & Delivery: Git/GitHub, Azure DevOps, GitHub Actions, CI/CD, Figma

Visualization: Chart.js, Mapbox GL JS, ApexCharts

EDUCATION

Master of Science in Computer Engineering (Software) Oct 2026 – Present

Islamic Azad University, Electronic Branch · Tehran

Bachelor of Science in Software Engineering Sep 2021 – Jan 2026

Islamic Azad University, Tehran East Branch · Tehran
